

AUTO TECH, AUTONOMOUS VEHICLE, CERTIFICATE OF TECHNOLOGY

Information

San Jacinto College can provide students with the training they need in the Autonomous Vehicle Certificate of Technology, which prepares individuals for employment as a Junior (Jr.) Fleet Technician.

Today's automobiles are complex with onboard computers and extensive electronics, e.g., vehicles are equipped with satellite guidance systems powered as a hybrid vehicle and/or battery electric vehicle (BEV) with the unique characteristics of hybrid and/or BEV systems. Upon completing this curriculum, students should be prepared to take multiple Automotive Service Excellence (ASE) Certification exams and be ready for full-time employment in the automotive service industry. Students interested in the Autonomous Vehicle Certificate of Technology must meet with the FAST coordinator or Department Chair before registering for automotive classes.

Students enrolling in San Jacinto College programs with external learning experiences (e.g., internships), will be required to comply with industry policy and procedure requirements. Failure to meet the industry requirements mandated by automotive service centers may limit a student's ability to complete the credential and/or delay the student's graduation date.

Likewise, students enrolling into San Jacinto College programs with external learning experiences (i.e., clinical, practicum, externship, cooperative, etc.) will be required to comply with the immunization requirements and policies of the clinical/external learning sites to engage in all clinical/external learning experiences. Vaccination requirements at clinical/external learning sites are implemented pursuant to the independent authority of such facilities and are not mandated by San Jacinto College. Failure to meet the immunization requirements mandated by clinical/external learning sites may limit a student's ability to complete the program and/or may delay the student's graduation date. San Jacinto College does not process exemptions, and students should address potential vaccination exemptions directly with the clinical/external learning site.
