

AUTO TECH, FUTURE AUTOMOTIVE SERVICE TECHNICIANS (FAST) PROGRAM AUTOMOTIVE TECHNOLOGY, ASSOCIATE OF APPLIED SCIENCE

Information

The Automotive Technology Future Automotive Service Technicians (FAST) program prepares individuals for employment as entry-level Automotive Service Technicians. San Jacinto College can provide students with the training they need. Today's automobiles are equipped with multiple computers and extensive electronics. Servicing vehicles equipped with active suspension, satellite guidance systems, and computer-controlled, multi-valve engines requires highly specialized training. Upon the completion of this curriculum, students should be prepared to take the Automotive Service Excellence (ASE) Certification exams.

Students enrolling into San Jacinto College programs with external learning experiences (i.e., clinical, practicum, externship, cooperative, etc.) will be required to comply with the immunization requirements and policies of the clinical/external learning sites to engage in all clinical/external learning experiences. Vaccination requirements at clinical/external learning sites are implemented pursuant to the independent authority of such facilities and are not mandated by San Jacinto College. Failure to meet the immunization requirements mandated by clinical/external learning sites may limit a student's ability to complete the program and/or may delay the student's graduation date. San Jacinto College does not process exemptions, and students should address potential vaccination exemptions directly with the clinical/external learning site.
