

ELECTRICAL TECHNOLOGY COMMUNICATIONS AND ALTERNATIVE ENERGY, ENHANCED SKILLS CERTIFICATE

Information

The Electrical Technology curriculum is designed to provide basic training for students to fill entry-level positions in the fields of construction, maintenance, design, marketing, residential, industrial, commercial, and other electrical-related industries.

The program will also allow electrical workers to upgrade their skills as they gain on-the-job experience.

Students enrolling into San Jacinto College programs with external learning experiences (i.e., clinical, practicum, externship, cooperative, etc.) will be required to comply with the immunization requirements and policies of the clinical/external learning sites to engage in all clinical/external learning experiences. Vaccination requirements at clinical/external learning sites are implemented pursuant to the independent authority of such facilities and are not mandated by San Jacinto College. Failure to meet the immunization requirements mandated by clinical/external learning sites may limit a student's ability to complete the program and/or may delay the student's graduation date. San Jacinto College does not process exemptions, and students should address potential vaccination exemptions directly with the clinical/external learning site.

Enhanced Skills Certificate

The Enhanced Skills Certificate in Electrical Technology Communications and Alternative Energy is designed for students who have completed the Electrical Technology Associate of Applied Science (AAS) (<https://publications.sanjac.edu/areas-study/construction-industry-manufacturing-transportation/electrical-technology-aas/#planofstudytext>) degree.
