

# HEALTH INFORMATION TECHNOLOGY, ASSOCIATE OF APPLIED SCIENCE

---

## Admission Requirements

The Health Information Technology program includes one clinical (practicum) course. Clinicals are unpaid positions in which students are supervised by a health information technology professional at the health care facility. Clinicals are scheduled during the day shift according to the availability of the site supervisor. The program cannot guarantee a specific site, but every effort will be made to accommodate the student. Students are responsible for their own transportation to and from the clinical site. A criminal background check is required of all program students and must be submitted prior to enrollment in the clinical course. Documentation of immunity to Measles, Mumps, Rubella and Varicella, completion of the Hepatitis B series, and annual Tuberculosis screening are also required prior to enrollment in the clinical course. Drug screening may be required by the clinical site.
