Program Information

If you possess stellar organizational, technological, and people skills and are interested in a career in health care, then San Jacinto College's Health Information Technology program is the career path for you. This program is designed to train future health information technology technicians to perform a variety of technical functions including organizing, analyzing, coding, and technically evaluating health information. Health information technicians work to ensure that complete and accurate records are kept for each patient in a health care facility.

The program is accredited by the Commission on Accreditation for Health Information and Information Management (CAHIIM). Upon completion of this program, the student is eligible to apply to take the national Registered Health Information Technician (RHIT) examination, administered by the American Health Information Management Association.

Program Accreditation

The San Jacinto College Health Information Technology program is accredited by the Commission on Accreditation for Health Informatics and Information Management Education (CAHIIM).
