

CANCER DATA MANAGEMENT, ASSOCIATE OF APPLIED SCIENCE

Join the Fight against Cancer

Each year, researchers and medical practitioners make astounding strides in cancer research and treatment all around the world. You can become a key player in this exciting process by studying Cancer Data Management at San Jacinto College. Cancer breakthroughs are made primarily by a global accumulation of data that doctors and researchers use to develop and fine-tune treatments. Hospitals, cancer organizations, and state and national governments maintain cancer registries to collect this data, and they need help from dedicated specialists.

Cancer registries collect, store, manage, and analyze data on people with cancer. They establish and maintain a cancer incidence reporting system, serve as an information resource for cancer research, and provide information to assist public health officials and agencies. For example, physicians need cancer data to learn more about the causes of cancer to be able to detect it earlier. Cancer registrars are trained to collect accurate, complete, and timely data.

The College designed the Associate of Applied Science (AAS) degree in Cancer Data Management to teach all aspects of the cancer registry, including survey processes, collection and abstraction of data, oncology coding, staging, and reporting. Upon completion of this program, the student is eligible to apply to take the national Certified Tumor Registrar (CTR) examination, administered by the National Cancer Registrars Association (NCRA).

Program Accreditation

The San Jacinto College Cancer Data Management AAS degree is accredited by the National Cancer Registrars Association (NCRA):

National Cancer Registrars Association, Inc. (NCRA)
1330 Braddock Place, Suite 520
Alexandria, VA 22314
Phone: 703-299-6640
Fax: 703-299-6620
E-mail: info@ncra-usa.org

Career Opportunities

Upon completing our program, students may pursue careers in cancer registry management in a hospital setting, free-standing state or national cancer registry, or in any of the state or national cancer organizations.

Earning Potential

The average salary for a Cancer Registrar/Abstractor is \$60,644 per year.¹
