

# MEDICAL IMAGING, MAMMOGRAPHY, ENHANCED SKILLS CERTIFICATE

## Information

Medical Imaging Technology consists of three Associate of Applied Science (AAS) degrees and four certificate programs.

The AAS degree programs are:

- Medical Radiography,
- Diagnostic Medical Sonography, and
- Invasive Cardiovascular Technology.

The advanced or enhanced certificate programs are:

- Computed Tomography,
- Invasive Cardiovascular Technology,
- Magnetic Resonance Imaging, and
- Mammography.

Students selected for any of the Medical Imaging programs are required to submit a physical exam prior to admission. This physical exam must be consistent with the requirements of the teaching hospitals and agencies the student is assigned during clinical assignments and the performance standards required to function as a student imaging technologist. The exam will also include documentation of any communicable diseases along with immunity to Rubella, Measles, Mumps, Varicella, and Hepatitis B. Additionally, completion of an updated Tetanus vaccine, an annual TB screening, and a seasonal flu vaccine are required.

In addition to meeting all other requirements, a criminal background check and drug and alcohol screening are required for all health science students attending imaging courses, and are required prior to admission to the program. Students entering a Medical Imaging program will also be required to show proof of health insurance and current CPR (American Heart Associate–Health Care Provider) certification. Students may contact the Medical Imaging department for details regarding the criminal background check and drug screening requirements.

## Enhanced Skills Certificate

The Mammography program is designed to prepare the registered Radiologic Technologist to enter the advanced field of Mammography. The objectives of the program are to provide the registered Radiologic Technologist with the 40 hours of training required by the Mammography Quality Standards Act, the knowledge, skills, and clinical requirements needed to obtain approval to sit and successfully pass the Mammography post primary examination offered by ARRT, and preparation for entry-level employment in Mammography.

A Mammographer uses specialized X-ray equipment to obtain diagnostic breast images and breast tissue biopsies. This specialized technologist is pivotal in the diagnosis of breast tissue abnormalities in both men and women. Students will learn to position patients and manipulate equipment to provide quality images. Furthermore, students will develop an understanding of anatomy, pathology, equipment, and technical factors, Quality Control/Quality Assurance, implant imaging, communication skills, and specialty equipment, as well as complete eight hours of Digital Mammography training.

The Mammography courses are offered each spring and fall semester. The entire program length is 16 weeks. Lecture and laboratory are offered the first eight weeks in a hybrid format with Tuesday evening classes. Day shift clinical rotations are offered the second eight weeks averaging 22 hours a week.
