Nursing, Bachelor of Science (RN-to-BSN) Program

Purpose Statement

The purpose of the Bachelor of Science in Nursing (RN-to-BSN) Program is to provide registered nurses with advanced knowledge and skills in nursing practice, community and public health, evidence-based practice, informatics, and leadership. The program builds upon the education and experience of associate degree-prepared registered nurses and prepares graduates to apply baccalaureate-level nursing knowledge in diverse healthcare and community settings.

Program Effectiveness Goals

1. Graduates will successfully complete the RN-to-BSN program within the established program timeframe.
2. Graduates will demonstrate achievement of baccalaureate-level nursing competencies.
3. Graduates will be employed or advance within the nursing profession.
4. Employers will be satisfied with the performance of program graduates.
5. Graduates will be satisfied with the quality of education received.

Outcome Data

Program Completion Data

Year	Rate
2023	90%
2024	95%
2025	96%

RN-to-BSN Program Expected Level of Achievement (ELA)

1. 90% of RN-to-BSN students will achieve the established End-of-Program Student Learning Outcomes (EOPSLOs)
2. 90% of students will complete the RN-to-BSN program on time.
