

MASSAGE THERAPY, CERTIFICATE OF TECHNOLOGY

Program Information

Looking for a profession that's literally hands-on? Are you passionate about helping people overcome injury, relieve stress, and generally live healthier lives? If so, San Jacinto College can prepare you for a career as a massage therapist in as few as two semesters. You will be introduced to a variety of massage modalities and discover what type of professional practice is right for you!

The San Jacinto College Massage Therapy program:

- Is a state-approved program that provides foundational training in the art and science of therapeutic massage. The 24-credit (640 contact-hour) program meets and exceeds the minimum educational requirements necessary for licensure in the state of Texas;
- Offers full-time students the possibility of completing the program in two (2) semesters, so graduates can be licensed and working in less than one year; and
- Places emphasis on a variety of massage therapy techniques, anatomy and physiology, kinesiology, pathology, healthy lifestyles, hygiene and sanitation, successful business practices, professional ethics, hydrotherapy, and spa modalities. Students also complete a hands-on clinical internship prior to graduating as required by the state of Texas.

Career Opportunities

Licensed massage therapists seek employment in:

- Massage therapy establishments,
- Wellness centers,
- Spas,
- Cruise lines,
- Medical settings, and
- Private practices.

A large majority of licensed massage therapists are self-employed.

For more information, students may contact Department Chair Mary Lindsay, 281-998-6350, x3587.
