COMPUTER INFO TECH (ITCS)

ITCS 3350 Project Management for Cybersecurity 3 Credits   (2 Lec, 3 Lab)
This course will utilize project management software for developing a cybersecurity project plan including timelines, milestones, scheduling, life cycle phases, management frameworks, skills, processes, and tools.
Course Type: Academic

ITCS 4315 Cybersecurity Incident Response Team 3 Credits   (2 Lec, 3 Lab)
This course provides students with the background and skills to manage information security incidents to minimize impact on business operations. Topics include detection, investigation, and response to different types of security incidents. Students explore these topics by developing incidence response plans; utilizing industry-standard processes and tools for investigating information security incidents; and recommending processes for incidence response that adhere to legal, regulatory, and organizational compliance. Students who have completed the course have a comprehensive view of cybersecurity incident detection and response.
